GENERAL INDEX, VOLUME 116 (1966)

Aalund, O. See Murphy
Altenbern, R. A. On the nature of albumin-promoted coagulase release by *Staphylococcus aureus*, 593
Amundsen, S. M. See Bittle
Anaplasma marginale,
incorporation of glycine by infected erythrocytes, 335
kinetics of antibody response to infection, 99
Anthrax,
pathogenesis of the lethal effect of toxin in the rat, 377
pathophysiology, 123
phagocytosis of spores, 401
Antibodies, effect of colchicine on hemolysin response, 139
Antibody synthesis, effect of ribonucleic acid digests on actinomycin D inhibition, 601
Arnwine, J. See McElree
Ash, R. J. and H. C. Bubel. Temporal relationship of interferon production and resistance to experimentally induced virus infection, 1
Avampato, J. See Bittle

Bacteria,
delivery and multiplication in mouse brain, 461
survival in blood, 238
Baldwin, J. N. See Donahue
Barua, D. See Sack
Beall, F. A. and F. G. Dalldorf. The pathogenesis of the lethal effect of anthrax toxin in the rat, 377
Bergdoll, M. S. Immunization of rhesus monkeys with enterotoxoid B, 191
Bittle, J. L., J. Avampato, S. M. Amundsen and J. H. Vickers. Results of testing production lots of oral poliovirus vaccine, 215
Blanchard, J. W. See Crawley
Blink, D. See Dowd
Bolande, P. See Igel
Bolles, D. M. See Muraschi
Borg-Petersen, C. See Fennestad
Brody, J. A., B. Huntley, T. M. Overfield and J. Maynard. Studies of human brucellosis in Alaska, 263
Brucella abortus, effect of chlorpromazine and streptomycin on survival in monocytes, 447
Brucellosis, human disease in Alaska, 263
Bruj, J. See Farník
Bubel, H. C. See Ash
Burrows, W. and G. M. Musteikis. Cholera infection in the rabbit ileal loop, 183. Also see Kasai and Leitch

Cantrell, W. and E. E. Elko. Effect of splenectomy on phagocytic activation of *Plasmodium berghei*, 429
Carleton, J. See Hamburger
Carlisle, H. N. See Saslaw
Carpenter, C. C. J. See Sack
Carrillo, J., B. Hashimoto and J. Kumate. Content of heterogenetic antigen in *Escherichia coli* and its relationship to diarrhea in newborn infants, 285.
Cholera,
biological characterization of El Tor hemolysin, 363
infection and toxin in rabbit ileal loop, 183
passive immunity in infant rabbits, 313
relation of vibrio antibodies to serum immune globulins, 329
titration of toxin and antitoxin in the rabbit ileal loop, 606
toxin and water-induced ion movement in the rabbit ligated ileal loop, 303
vibriocidal and agglutinating antibody patterns, 630
Cole, C. R. See Saslaw
Corticosteroids, effect on antibody and immunity in *Besnoitia* infection, 414
Crawley, G. J., I. Gray, W. A. Leblang and J. W. Blanchard. Blood binding, distribution, and excretion of staphylococcal enterotoxin in monkeys, 48
Crozier, D. See Currie
Cryptococcosis, indirect fluorescent antibody tests, 573
Cryptococcus neoformans,
effect of cationic proteins on experimental infections, 551, 566
humoral defense mechanisms, 75
Currie, J. A., J. D. Marshall, Jr. and D. Crozier. The detection of *Pasteurella tuberculosis* antibodies by the microhemagglutination test, 117

Dalldorf, F. G. See Beall
Davies, W. L. See Grunert
Dobbs, J. P. See Klein
Donahue, J. A. and J. N. Baldwin. Hemolysin and leukocidin production by 80/81 strains of *Staphylococcus aureus*, 324
Dowd, J. M., D. Blink, C. H. Miller, P. F. Frank and W. E. Pierce. Antibiotic prophylaxis of carriers of sulfadiazine-resistant meningococci, 473
Dressler, H. R. See Gordon
Dunbar, C. E. and K. Wolf. The cytological course of experimental lymphocystis in the bluegill, 466
Dusanic, D. G. and R. M. Lewert. Electrophoretic studies of the antigen-antibody complexes of *Trichinella spiralis* and *Schistosoma mansoni*, 279

Edwards, E. A. See Lytle
Eisler, D. M. See Hildebrand
Ekstedt, R. D. Studies on immunity to staphylococcal infection in mice. IV. The role of specific and nonspecific immunity, 514
Elko, E. E. See Cantrell
Ellner, P. D. and C. J. Stoessel. The role of temperature and anticoagulant on the in vitro survival of bacteria in blood, 238
Endotoxin, bioassay in rabbits and chick embryos, 529
Erlandson, A. L., Jr. The induction of nonspecific resistance in mice by papain, 297
Escherichia coli,
heterogenetic antigen in relation to diarrhea of newborn infants, 285
serum resistance in cell-grown organisms, 231
Eveland, W. C. See Watson

Fabiyi, A. See Sever
Farník, J. and J. Bruj. An outbreak of influenza A2 in a population with a known antibody profile, 425
Felsenfeld, A. D. See Felsenfeld, O.
Felsenfeld, O., A. D. Felsenfeld, W. E. Greer and C. W. Hill. Relationship of some vibrio antibodies to serum globulins in man and in *Cercopithecus aethiops*, 329
Fennestad, K. L. and C. Borg-Petersen. Experimental leptospirosis in pregnant sows, 57
Finkelstein, R. A. See Milner
Fitzpatrick, D. F. See Klein
Frank, P. F. See Dowd
Frenkel, J. K. and M. N. Lunde. Effects of corticosteroids on antibody and immunity in *Besnoitia* infection of hamsters, 414
Fukui, G. M. See Goldenbaum

Gadebusch, H. H. and A. G. Johnson. Natural host resistance to infection with *Cryptococcus neoformans*. IV. The effect of some cationic proteins on the experimental disease, 551. V. The influence of cationic tissue proteins upon phagocytosis and on circulating antibody synthesis, 566
Gerhardt, P. See Shafa
Gerloff, R. K., D. B. Ritter and R. O. Watson. DNA homology between the meningopneumonitis agent and related microorganisms, 197
Gillmore, J. D., P. M. Versage and R. A. Phillips. Specific and nonspecific passive immunity in infant rabbit cholera, 313
Gíslason, G. See Thormar
Goldenbaum, E. G., R. W. I. Kessel and G. M. Fukui. Effect of chlorpromazine and streptomycin on the survival of *Brucella abortus* in guinea pig monocytes, 447
Gordon, F. B., E. Weiss, A. L. Quan and H. R. Dressler. Observations on guinea pig inclusion conjunctivitis agent, 203
Gray, I. See Crawley
Greer, W. E. See Felsen, O.
Gruber, J. and M. Scherago. Attempts to produce rheumatic fever and in vitro leukocytic hypersensitivity with group A streptococci, 89
Grunert, R. R., W. L. Davies, J. W. McGahen, C. E. Hoffman and R. A. Yates. The antiviral activity of labile carbamyl compounds and cyanate against the pseudorabies virus in vivo, 346. Also see Yates
Guinea pig inclusion conjunctivitis agent, properties, 203

Hahon, N. Fluorescent cell-counting assay of yellow fever virus, 33
Hamburger, M. and J. Carleton. Staphylococcal spheroplasts and L colonies. I. Population curves of vegetative staphylococci and spheroplasts in methicillin-containing broth over long periods, 221. II. Conditions conducive to reversion of spheroplasts to vegetative staphylococci, 544
Hashimoto, B. See Carrillo
Hawkins, J. E. See Savard
Hegarty, C. P. See Rosanoff
Helgadóttir, H. See Thormar
Hendrix, K. J. See Klein
Herpes simplex virus, interferon and antibody production in skin infections, 455
Hildebrand, G. J., J. Ng, E. K. von Metz and D. M. Eisler. Studies on the mechanism of circulatory failure induced in rats by *Pasteurella pestis* murine toxin, 615. Also see Wolochow
Hill, C. W. See Felsenfeld, O.
Hoffman, C. E. See Grunert
Huntley, B. See Brody
Hurst, V. and V. L. Sutter. Survival of *Pseudomonas aeruginosa* in the hospital environment, 151

Igel, H. J. and E. A. Edwards. Humoral defense mechanisms in cryptococcosis: Substances in normal human serum, saliva and cerebrospinal fluid affecting the growth of *Cryptococcus neoformans*, 75
Infectious mononucleosis, attempt to isolate the etiologic agent, 343
Influenza virus, outbreak of A2 in a population with a known antibody profile, 425
Interferon, role in resistance to virus infection, 1
Intestinal wall, translocation of microorganisms, 523
Iwert, M. E. See Leitch

Jaroslow, B. N. and K. Shortman. Restoration of actinomycin D-inhibited antibody synthesis by ribonucleic acid digests, 601
Jaroslow, B. N. and W. H. Taliaferro. The effect of colchicine on the hemolysin response in unirradiated and irradiated rabbits, 139
Jenkin, H. M. The continuous passage of agents of trachoma in cell cultures. I. Characteristics of TW-3 and Bour strains of trachoma cultivated in serial passage in HeLa 229 cells, 390
Johnson, A. G. See Gadebusch, 551, 566
Jones, W. I., Jr. See Klein

Kapral, F. A. See Taubler
Kasai, G. J. and W. Burrows. The titration of cholera toxin and antitoxin in the rabbit ileal loop, 606
Kendrick, P. L. See Kourany
Kessel, R. W. I. See Goldenbaum
Kim, C. W. Delayed hypersensitivity to larval antigens of *Trichinella spiralis*, 208
Klebsiella pneumoniae, protective activity of normal chicken serum, 27
Klein, F., J. S. Walker, D. F. Fitzpatrick, R. E. Lincoln, B. G. Mahlandt, W. I. Jones, Jr., J. P. Dobbs and K. J. Hendrix. Pathophysiology of anthrax, 123
Kourany, M. and P. L. Kendrick. Interaction between a human monocytic cell line and *Salmonella typhosa*, 495
Kumate, J. See Carrillo
Kunin, C. M. See Reynolds

Lamanna, C. See Wolochow
Leblang, W. A. See Crawley
Leitch, G. L., M. E. Iwert and W. Burrows. Experimental cholera in the rabbit ligated ileal loop: Toxin-induced water and ion movement, 303
Leptospirosis,
  experimental infection in pregnant sows, 57
  immunofluorescence in diagnosis, 537
Lewert, R. M. and B. J. Para. The physiological incorporation of carbon 14 in *Schistosoma mansoni* cercariae, 171. Also see Dusanic
Lin, H.-S. and J. W. Moulder. Patterns of response to sulfadiazine, D-cycloserine, and D-alanine in members of the psittacosis group 372
Lincoln, R. E. See Klein
Lindsay, M. See Muraschi
Listeria monocytogenes, phage-fluorescent antiphage staining, 155
Liu, P. V. The roles of various fractions of *Pseudomonas aeruginisa* in its pathogenesis. II. Effects of lecithinase and protease, 112. III. Identity of the lethal toxins produced in vitro and in vivo, 481.
Lunde, M. N. See Frenkel
Lymphocystis, cytological course of infection in the bluegill, 466
Lytle, R. I., M. W. Rytel and E. A. Edwards, Correlation of immunological and biological factors in the host with susceptibility to respiratory infection, 67

McCormack, R. C. See Reynolds
McElree, H., J. Pitcher and J. Arnwine. Transiently acquired serum resistance by cell-grown *Escherichia coli*, 231
McGahen, J. W. See Grunert
Maedi, neutralizing antibodies in sheep, 41
Mahlandt, B. G. See Klein
Marshall, J. D., Jr. See Currie

TABLE OF CONTENTS

No. 1, February, 1966

PAGE

R. J. Ash and H. C. Bubel. Temporal relationship of interferon production and resistance to experimentally induced virus infection 1

Ichiro Yamamoto. Ultrastructural changes in mesenteric lymph nodes of mice infected with *Salmonella enteritidis* 8

John L. Sever, Gilbert W. Meier, William F. Windle, Gilbert M. Schiff, Gillis R. Monif and Akinyele Fabiyi. Experimental rubella in pregnant rhesus monkeys 21

Ellen Ruth Picoff. Protective activity of normal chicken serum in *Klebsiella pneumoniae* infection 27

Nicholas Hahon. Fluorescent cell-counting assay of yellow fever virus 33

Halldór Thormar, Gudmundur Gíslason and Helga Helgadóttir. A survey of neutralizing antibodies against maedi virus in sera from flocks of sheep affected with maedi and from healthy flocks 41

Gerald J. Crawley, Irving Gray, Wayne A. Leblang and Jack W. Blanchard. Blood binding, distribution and excretion of staphylococcal enterotoxin in monkeys 48

K. L. Fennestad and C. Borg-Petersen. Experimental leptospirosis in pregnant sows 57

R. I. Lytle, M. W. Rytel and E. A. Edwards. Correlation of immunological and biological factors in the host with susceptibility to respiratory infections 67

Howard J. Igel and Robert P. Bolande. Humoral defense mechanisms in cryptococcosis: Substances in normal human serum, saliva, and cerebrospinal fluid affecting the growth of *Cryptococcus neoformans* 75

Thelma F. Muraschi, Dorothy M. Bolles, Catherine Moczulski and Marjorie Lindsay. Serologic types of *Pseudomonas aeruginosa* based on heat-stable O antigens: Correlation of Habs' (European) and Verder and Evans' (North American) classifications 84

Jack Gruber and Morris Scherago. Attempts to produce rheumatic fever and in vitro leukocytic hypersensitivity with group A streptococci 89

Frederick A. Murphy, John W. Osebold and Ole Aalund. Kinetics of the antibody response to *Anaplasma marginale* infection 99

Pinghui V. Liu. The roles of various fractions of *Pseudomonas aeruginosa* in its pathogenesis. II. Effects of lecithinase and protease 112

No. 2, April, 1966

Julius A. Currie, John D. Marshall, Jr. and Dan Crozier. The detection of *Pasteurella pseudotuberculosis* antibodies by the microhemagglutination test 117

Frederick Klein, Jerry S. Walker, David F. Fitzpatrick, Ralph E. Lincoln, Bill G. Mahlandt, William I. Jones, Jr., James P. Dobbs and Kenneth J. Hendrix. Pathophysiology of anthrax 123

Bernard N. Jaroslow and William H. Taliaferro. The effect of colchicine on the hemolysin response in unirradiated and irradiated rabbits 139

VALERIE HURST AND VERA L. SUTTER. Survival of *Pseudomonas aeruginosa* in the hospital environment 151
BERNARD B. WATSON AND WARREN C. EVELAND. The application of the phage-fluorescent antiphage staining system in the specific identification of *Listeria monocytogenes*. II. The use of the phage-fluorescent antiphage system in the specific identification of *Listeria monocytogenes* in tissues from experimentally infected animals 155
H. SUGIYAMA. Endotoxin-like responses induced by staphylococcal enterotoxin 162
ROBERT M. LEWERT AND B. JOAN PARA. The physiological incorporation of carbon 14 in *Schistosoma mansoni* cercariae 171
